PRODUCT DESCRIPTION

DC switchboard designed for wall mounting, IP65/20 serving as an input switchboard from photovoltaic panels (to the inverter) for the entire portfolio of photovoltaic power plants. Especially when using other switchgears, also EATON IKA-2/36-ST.

Its advantage is its compact size, the possibility of "stacking" with other AC switchboards next to each other or under each other, which makes it possible to install it even in a space where higher coverage is required.

The switchboard is fitted with DC surge arresters - T1+T2 and fuse disconnectors including gPV fuses to protect the DC input to the inverter.

Suitable to combine with switchboards for the alternating part of the installation fitted in EATON IKA switchboards. For example R-AC-50-N0-IKA.
