PRODUCT DESCRIPTION

AC switchgear intended for wall mounting, IP65/20C serving as an input switchgear (at the inverter) for three-phase photovoltaic power plants (typically inverters: GOODWE, SOLAX, ,GROWATT, WATTSONIC and others).

Its advantage is its small size, the possibility of "stacking" with other AC switchboards next to each other or under each other, which makes it possible to install them even in areas where space is a problem.

The switchboard is fitted with an AC surge arrester T1+T2, a B25/3 circuit breaker to protect the input to the inverter. Furthermore, Circuit Breaker B2/1 which secures the SOCKET/RELAY Finder, which ensures N0% to meet the conditions of the distribution (includes both NC and NO contact and center.) Which ensures use for all types of converters on the market.

Suitable to combine with switchboard R-FVE-DC2T1-IKA, R-FVE-DC3T1-IKA for the DC part of the installation and switchboard R-FVE-A40-2 for backup circuits with a manual switch (bypassing the inverter), or switchboard R-FVE-Z4 with circuit breaker, sockets and fuse.
