## PRODUCT DESCRIPTION

The Dražice OKCEV 125 electric water heater boasts a capacity of up to 123 liters. It can be fixed in a horizontal position using the included fixing brackets. The ceramic heating element, which significantly extends the life of the device, is controlled by an operating thermostat and its protection is ensured by a safety thermostat (the so-called thermal fuse). To prevent pitting in hard and chlorinated water environments, the inside of the heater is coated with an anti-corrosion layer. Covestro's high-quality insulation ensures low heat loss and minimizes operating costs.

**Weight – 48 kg.**

**This product cannot be purchased separately!**
