PRODUCT DESCRIPTION

The Dražice OKCEV 160 electric water heater boasts a capacity of up to 148 liters. It can be fixed in a horizontal position using the included mounting brackets. The ceramic heating element, which significantly extends the life of the device, is controlled by an operating thermostat and is protected by a safety thermostat (so-called thermal fuse). To prevent pitting corrosion in hard and chlorinated water environments, the interior of the heater is coated with an anti-corrosion layer. High-quality Covestro insulation ensures low heat loss and minimizes operating costs.

Weight - 54 kg.

This product cannot be purchased separately!
