PRODUCT DESCRIPTION

Thanks to special design and technologies, panels of the CS6W-MS series achieve higher performance. A lower operating temperature ensures a better energy yield. These panels use dual cell technology, which means their cells are half the width, minimizing energy loss. They are divided into two separate parts, so even when one half is partially shaded, the other still works. This increases their tolerance to partial shading.

Weight - 24.2 kg.

This product cannot be purchased separately!
