## PRODUCT DESCRIPTION

AC switchboard designed for wall mounting, IP65 used to serve a three-phase photovoltaic power plant (typically a Goodwe 4 to 10K-ET inverter).

Its advantage is the automatic switching between standard operation from the network and backup. It is necessary to control the load during a power failure to avoid overloading, as its function switches the whole house to inverter backup.

An indisputable advantage is the minimal intervention in the customer's switchboard - the Smartmeter (inverter measurement), the common breakdown point and all fuses are part of this switchboard. It is enough to make a loop between hl. switchgear and technology placement.

*Note The Smartmeter is not part of the delivery of AZ TRADERS.sro If the customer supplies Smartmeters, we are able to install them in the switchboards.*

The switchboard is also equipped with emergency disconnection of the HDO inverter (N0%) and preparation for the installation of the FIRE-SAFETY solution. The GW25 type is designed for the main breaker in the 25A pole.

There is a slight time delay when switching (switching of contactors) - so it is not a fail-safe backup solution
