PRODUCT DESCRIPTION

AC switchgear designed for wall mounting, IP40/20 serving as an input switchgear (at the inverter) for single-phase photovoltaic power plants (typically Goodwe 1000-XS to 3000-XS inverter and Goodwe series 3000D-NS to 3600D-NS).

Its advantage is its small size, the possibility of "stacking" with other AC switchboards next to each other or under each other, which makes it possible to install it even in areas where space is a problem.

The switchboard is fitted with an AC overvoltage arrester, B16/1 circuit breakers to protect the input to the inverter.

Suitable to combine with the switchboard R-FVE-DC1 and R-FVE-DC2 for the DC part of the installation.
