Switchgear R-FVE-G2 – protection class I+II (with AC arrester)

R-FVE-G2/AC

Wall mounting. IP65. 3F FVE operation (typically a Growatt 4 to 10K inverter). Minimal intervention in the customer's switchboard - Smartmeter, common breakdown point and all fuses are part of this switchboard. It is enough to make a loop between hl. switchgear and technology placement.

PRODUCT DESCRIPTION

AC+DC switchboards designed for wall mounting, IP65, used to operate a three-phase photovoltaic power plant (typically a Growatt 4 to 10K inverter).

An indisputable advantage is the minimal intervention in the customer's switchboard - the Smartmeter (inverter measurement), common breakdown point and all fuses are part of this switchboard. So, it is enough to make a loop between the main switchboard and the location of the technology.

Note: Smartmeter is not part of the AZ TRADERS sro delivery. If the customer supplies Smartmeters, we are able to install them in the switchboards.

The switchboard also has a crisis disconnection of the HDO inverter (N0%). The R-FVE-A40-1 switchboard is designed for a main circuit breaker in a column with a maximum of 40 A. It also contains DC fuse disconnectors and surge arresters.
